

GO₂TM CALIFORNIA TURKEY FARM RESEARCH PROGRAM

EFFECTS ON TURKEY GROWING

TURKEY GROWER RESULTS (CALIFORNIA):

- All Slime removed after 4 weeks
- Weight increase after Slime removal, compared to chlorine-acid treatment
- No harmful effect on birds
- Non-corrosive (unlike chlorine)
- No water acidification required (but 100% possible if desired)

TURKEY EGG SANITIZING TRIAL

In a 2½ month trial involving 945,000 turkey eggs on a breeder farm with paired egg rooms at a major turkey company in North Carolina, GO₂ was compared to a conventional quaternary product for sanitizing eggs.

BASIC INFO:

- AquaMagic Egg Sanitizer
- Quat level used- 800ppm
- ClO₂ level used- 1ppm

RESULTS:

- There was a .23% increase on hatch of eggs set using ClO₂
- Resulting in 2174 more poults
- Additionally, the cost of ClO₂ used was 1/3 less \$\$ than the quat cost
